ROOFING SYSTEM**

**AV ROOFINGS**

smart roof for smart homes

**THE FIRST OF ITS  
KIND IN TAMIL NADU!**

# A CLASS APART

Everything important to you - your family, prized possessions, and your business lie under your roof. This includes everything you make, everything you save, everything you nurture, and even every employee you hire. This is why choosing the right roof is crucial, and it is something you can't compromise on.

Unlike metal sheets or clay tiles, AV Roofings' unique 9-layered product lets you enjoy the rain in peace without the noise the sound makes on metal. The breakthrough technology used to manufacture the roofing tiles gives you the peace of mind to enjoy your home without thinking about costly repairs, painting, or constant upkeep.

## 8. GRANULES OF NATURAL STONE

Provide excellent surface coverage and protection in a wide range of attractive colors

## 9. ACRYLIC GLAZE

Clear acrylic resin coating in a semi gloss finish

# GIVE YOUR HOMES A FACELIFT!

# WHY CHOOSE AV ROOFINGS?

## No rainwater sound

The stone layer that forms one of the top coatings of the roof provides a durable sound barrier that minimizes the sound of rain.

## Weather-resistant

The tiles are built to withstand any weather condition, be it rain, heat, or extreme wind, as well!

## Corrosion-resistant

As part of the 9-layers, the roofing tiles come with strong Aluminium-Zinc and Epoxy primer layers that protect the underside metal sheet from corrosion due to weather activities.

## Beautiful matte look

The Acrylic resin coating on the top provides a semi-gloss matte look that gives your home a sophisticated and classy look.

## Temperature drop of 10 degrees Celsius

The 9 layers provide good insulation in the area and reduce the temperature by 8 degrees Celsius underneath it, unlike metal sheets.

## Lightweight

One square foot of clay roof is 4kgs, but one square foot of AV roofs is just 450 gms!

## 5 colours

Customers can choose the colour of the roof that will resonate with their home's personality and theirs as well!

## 30 years life

The tiles are designed to last a minimum of 30 years and can help avoid costly repairs as soon as 5-10 years down the line.

## Strong

The strength of AV Roofings is unrivaled. The 9-layer roof made of high-quality materials provides homes with the protection it needs.

## 10 years colour warranty

No need to worry but constant upkeep and maintenance!
